b. Measures of Central Tendency

These determine the "center" of a data set.

Mean: The average of all data points.

Median: The middle value when data is ordered.

Mode: The most frequently occurring value.

When to use each: For symmetric distributions, mean is preferred; for skewed distributions, median provides better central tendency insights.

c. Measures of Variability

These describe the spread of data points.

Range: Difference between maximum and minimum.

Variance: Average of squared deviations from the mean.

Standard deviation: Square root of variance; indicates average deviation.

Coefficient of variation: Standard deviation expressed as a percentage of the mean.
